

GREEN LIGHTS RECYCLING

COMPLETE HARD DRIVE DESTRUCTION

HIPAA AND FACTA COMPLIANT

Green Lights Recycling is pleased to announce two new services for computer hard drive destruction. We have always guaranteed computer hard drive destruction as a part of our services. Recently, we added two new in-house machines to expand our service offering and capabilities.

The two machines are called the “Enforcer 12,000” and the “Nemesis 480”. The Enforcer 12,000 is portable and can be used at customer locations for on-site hard drive destruction which is HIPAA and FACTA compliant. The Nemesis 480 is a stationary hard drive shredder. Intact hard drives are fed into the machine and they are completely shredded.

Green Lights Recycling knows that confidential data destruction is imperative and these new machines allow us to ensure that confidential data is completely destroyed.

Please contact us for additional information.
